Overview of UP Board Class 10 Maths Syllabus

The UP Board Class 10 Maths syllabus covers various chapters, each with different types of problems. The key chapters include:

- Real Numbers
- Polynomials
- Coordinate Geometry
- Linear Equations in Two Variables
- Triangles
- Circles
- Surface Areas and Volumes
- Statistics

- Probability

In this guide, we present detailed solutions for exercises from these chapters.

Chapter-wise Detailed Solutions

- Real Numbers

Exercise: Euclid's Lemma and Fundamental Theorem of Arithmetic

Q: Prove that $\sqrt{2}$ is irrational.

Solution:

- Assume, for contradiction, that $\sqrt{2}$ is rational. Then, it can be expressed as a fraction in lowest terms: $\sqrt{2} = p/q$, where p and q are integers with no common factors.

- Squaring both sides gives: $2 = p^2/q^2$.

- Rearranged as: $p^2 = 2q^2$.

- This implies p^2 is even, so p must be even. Let $p = 2k$, where k is an integer.

- Substituting back: $(2k)^2 = 2q^2 \Rightarrow 4k^2 = 2q^2 \Rightarrow 2k^2 = q^2$.

- Therefore, q^2 is even, which means q must be even.

- But both p and q are even, contradicting the initial assumption that the fraction is in lowest terms.

Conclusion: $\sqrt{2}$ is irrational.

- Polynomials

Exercise: Factorization of Polynomials

Q: Factorize the polynomial $x^3 + 3x^2 - 4x - 12$.

Solution:

- Apply Rational Root Theorem to find possible roots: $\pm 1, \pm 2, \pm 3, \pm 4, \pm 6, \pm 12$.

- Test $x = 1$:

$$- 1 + 3 - 4 - 12 = -12 \neq 0.$$

- Test $x = 2$:

$$- 8 + 12 - 8 - 12 = 0 \text{ ? root found at } x = 2.$$

- Use synthetic division or polynomial division to factor out $(x - 2)$:

Synthetic division:

...

$$2 \mid 1 \ 3 \ -4 \ -12$$

$$\mid 2 \ 10 \ 12$$

$$1 \ 5 \ 6 \ 0$$

...

Resulting polynomial: $x^2 + 5x + 6$.

- Factor $x^2 + 5x + 6$:

- $(x + 2)(x + 3)$.

- Final factorization:

\[

$$x^3 + 3x^2 - 4x - 12 = (x - 2)(x + 2)(x + 3).$$

\]

- Coordinate Geometry

Exercise: Distance Formula and Midpoint

Q: Find the distance between points A(3, 4) and B(7, 1). Also, find the midpoint of AB.

Solution:

- Distance:

\[

$$d = \sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$$

\]

\[

$$d = \sqrt{(7 - 3)^2 + (1 - 4)^2} = \sqrt{4^2 + (-3)^2} = \sqrt{16 + 9} = \sqrt{25} = 5$$

\]

- Midpoint:

$\backslash$

$$M = \left(\frac{x_1 + x_2}{2}, \frac{y_1 + y_2}{2} \right) = \left(\frac{3 + 7}{2}, \frac{4 + 1}{2} \right) = (5, 2.5)$$

 $\backslash$

- Linear Equations in Two Variables

Exercise: Graphical Solution

Q: Graph the equations:

- $2x + y = 6$

- $x - y = 1$

Find the point of intersection.

Solution:

- Equation 1:

- When $x = 0$, $y = 6$.

- When $y = 0$, $x = 3$.

- Equation 2:

- When $x = 0$, $y = -1$.

- When $y = 0$, $x = 1$.

Plotting these points and drawing lines, the intersection point can be found algebraically:

\[

$$2x + y = 6 \quad \rightarrow y = 6 - 2x$$

\]

\[

$$x - y = 1 \quad \rightarrow y = x - 1$$

\]

Set equal:

\[

$$6 - 2x = x - 1 \quad \rightarrow 6 + 1 = 3x \quad \rightarrow 7 = 3x \quad \rightarrow x = \frac{7}{3}$$

\]

\[

$$y = \frac{7}{3} - 1 = \frac{7}{3} - \frac{3}{3} = \frac{4}{3}$$

\]

Point of intersection: $\left(\frac{7}{3}, \frac{4}{3}\right)$.

- Triangles

Exercise: Pythagoras Theorem

Q: In triangle ABC, if AB = 13 cm, AC = 5 cm, and BC = 12 cm, verify whether triangle ABC is right-angled.

Solution:

- Check if Pythagoras theorem holds:

\[

$$AB^2 = AC^2 + BC^2$$

\]

\[

$$13^2 = 5^2 + 12^2$$

\]

\[

$$169 = 25 + 144 = 169$$

\]

Since both sides are equal, triangle ABC is right-angled at C (opposite side BC).

- Circles

Exercise: Equation of a Circle

Q: Write the equation of a circle with center at (2, -3) and radius 5.

Solution:

Standard form:

\[

$$(x - h)^2 + (y - k)^2 = r^2$$

\]

Plugging in:

\[

$$(x - 2)^2 + (y + 3)^2 = 25$$

\]

This is the required equation of the circle.

- Surface Areas and Volumes

Exercise: Volume of a Cylinder

Q: Find the volume of a cylinder with radius 7 cm and height 10 cm.

Solution:

\[

$$V = \pi r^2 h = \frac{22}{7} \times 7^2 \times 10 = 22 \times 7 \times 10 = 1540 \text{ cm}^3$$

\]

- Statistics

Exercise: Mean Calculation

Q: Find the mean of the following data: 12, 15, 14, 10, 13.

Solution:

\[

$$\text{Mean} = \frac{12 + 15 + 14 + 10 + 13}{5} = \frac{64}{5} = 12.8$$

\]

- Probability

Exercise: Basic Probability

Q: A bag contains 4 red, 5 blue, and 6 green balls. What is the probability of drawing a green ball?

Solution:

$$\text{Total balls} = 4 + 5 + 6 = 15$$

Probability:

\[

$$P(\text{green}) = \frac{6}{15} = \frac{2}{5}$$

\]

The Routledge Library Edit titled *Film and the Working Class* offers an essential resource for scholars, students, and cinephiles interested in exploring how cinema has historically represented, shaped, and challenged working-class identities and experiences. This comprehensive collection delves into themes such as class consciousness, social realism, labor struggles, and the portrayal of working-class communities across different eras and regions. By examining these films critically, readers gain a nuanced understanding of how cinema acts as both a mirror and a catalyst for social change among working-class populations.

The Significance of Film in Representing the Working Class

Films serve as powerful tools for reflecting societal realities, and their portrayal of the working class provides critical insights into social structures, cultural identities, and political struggles. The Routledge Library Edit emphasizes that cinema has historically been a site of both affirmation and critique for working-class experiences.

Historical Context of Working-Class Films

Throughout the 20th century, filmmakers have documented the realities faced by working-class communities, often aiming to raise awareness or foster solidarity. The rise of social realism in cinema, especially during the post-war period, marked a pivotal moment where filmmakers sought to depict authentic working-class lives. Films like *The Bicycle Thief* (1948) and *Kes* (1969) exemplify this approach, emphasizing everyday struggles and social injustices.

Representation and Stereotypes

While many films have offered genuine portrayals of working-class life, there is also a history of stereotypes and misrepresentations. The Routledge collection critically examines how certain films have perpetuated negative stereotypes, such as depicting working-class characters as lazy or morally deficient, which can influence societal perceptions. Conversely, the collection highlights films

that challenge these stereotypes by presenting complex, multidimensional characters.

Key Themes Explored in the Routledge Collection

The collection explores numerous themes central to understanding the relationship between film and the working class. These themes provide a framework for analyzing how cinema influences cultural perceptions and social realities.

Social Realism and Authenticity

Social realism as a genre aims to depict life truthfully, often focusing on the struggles of working-class individuals. The Routledge collection discusses influential filmmakers like Ken Loach and the Dardenne brothers, whose works exemplify this approach. These films often employ non-professional actors and on-location shooting to enhance authenticity.

Labor and Industrial Struggles

Films that depict labor movements, strikes, and industrial decline serve as powerful narratives of working-class resistance. Documentaries and fictional films alike explore themes of solidarity, exploitation, and the fight for workers' rights. Examples include *Matewan* (1987) and *Reds* (1981).

Urban Working-Class Communities

Urban environments are often depicted as sites of community, conflict, and cultural expression for working-class populations. Films such as *Do the Right Thing* (1989) and *Boyz n the Hood* (1991) portray the complexities of life in marginalized urban neighborhoods.

Class Identity and Cultural Expression

The collection also explores how working-class communities create their own cultural forms, such as music, humor, and activism, which are often reflected in cinema. Films that highlight these cultural expressions demonstrate the resilience and agency of working-class groups.

Analyzing Films Through a Working-Class Lens

Critical analysis is vital for understanding how films construct working-class identities and narratives. The Routledge collection provides methodologies and theoretical frameworks for such analyses.

Marxist and Cultural Theories

Applying Marxist theory allows viewers to examine how films depict class struggle, economic power,

and social inequality. Cultural theories further explore how cinema shapes and is shaped by working-class culture.

Feminist and Intersectional Approaches

An intersectional lens considers how gender, race, and class intersect in cinematic portrayals, revealing layered experiences within working-class communities. Films such as *Norma Rae* (1979) exemplify these complex narratives.

Genre and Style Analysis

Different cinematic genres?such as social realism, comedy, or melodrama?offer varied perspectives on working-class life. Analyzing stylistic choices helps uncover the filmmakers' intentions and audience reception.

Impact of Films on Working-Class Identity and Activism

Cinema not only reflects working-class realities but also influences social movements and political activism. The Routledge collection discusses how films have inspired collective action and fostered a sense of identity among working-class audiences.

Films as Tools for Awareness and Mobilization

Movies like *The Grapes of Wrath* (1940) and *Norma Rae* have historically galvanized audiences to support labor rights and social justice causes. These films serve as rallying points for activism and community organization.

Creating a Working-Class Cultural Identity

Cinema contributes to the construction of a shared cultural identity by highlighting common struggles, humor, and resilience. The collection underscores the importance of representation in fostering pride and solidarity.

Global Perspectives on Film and the Working Class

While many studies focus on Western cinema, the Routledge Library Edit emphasizes the importance of global perspectives. Films from different regions and cultures depict unique working-class experiences, expanding our understanding of social realities worldwide.

European Social Realist Cinema

European filmmakers have a rich tradition of social realism, with countries like Italy, France, and the UK producing influential works. The collection discusses how these films address post-war reconstruction, economic hardship, and social change.

Asian and Latin American Perspectives

Asian cinema, such as Indian kitchen sink films and Chinese labor documentaries, alongside Latin American films like *The Official Story*, depict working-class struggles within their specific cultural and political contexts.

Indigenous and Minority Working-Class Films

The collection also highlights films by indigenous filmmakers and marginalized communities, providing a voice to those often excluded from mainstream narratives. These films challenge dominant representations and shed light on intersecting identities.

Future Directions in Film and Working-Class Studies

As society evolves, so does the portrayal of working-class life in cinema. The Routledge collection prompts scholars and filmmakers to consider new questions and approaches.

Digital Media and New Platforms

The rise of streaming services and independent digital filmmaking offers new opportunities for working-class stories to reach wider audiences. These platforms facilitate grassroots storytelling and activism.

This comprehensive collection, part of Routledge's esteemed library series, offers an in-depth exploration of the intersections between film, class identity, socio-economic dynamics, and cultural representation. As cinema continues to evolve in its storytelling methods and thematic focus, examining its relationship with the working class reveals vital insights into societal attitudes, political discourse, and cultural narratives over the decades.

The Significance of the Routledge Library Edition in Cultural and Film Studies

A Key Resource for Analyzing Class in Cinema

The Routledge Library Edition dedicated to film and the working class serves as an essential academic tool, consolidating a broad spectrum of scholarly essays, historical analyses, and theoretical frameworks. Its significance lies not only in its comprehensive coverage but also in its role in challenging dominant narratives that often marginalize working-class experiences.

This collection advances the understanding that cinema is not merely entertainment but a powerful cultural artifact that shapes perceptions of social realities. Through meticulous analysis, the edition examines how films have historically depicted working-class life, highlighting themes of exploitation, solidarity, aspiration, and resistance.

Bridging History and Theory

The collection bridges historical developments with theoretical insights, providing context for how film representations of the working class have evolved. From early silent films to contemporary cinema, the Routledge edition traces shifts in portrayal, illustrating how societal attitudes toward the working class have been reflected, reinforced, or challenged through cinematic storytelling.

Historical Evolution of Working-Class Representation in Film

Early Cinema and the Stereotyping of the Working Class

In the nascent days of cinema, the working class was often depicted through stereotypical lenses, emphasizing caricatures that reinforced existing social hierarchies. Silent films and early talkies portrayed workers as either comic figures, villains, or noble saviors, depending on the narrative's ideological stance.

Key features of early representations include:

- Caricatured Characters: Exaggerated traits emphasizing roughness or simplicity.
- Moral Dichotomies: Good working-class characters versus corrupt or lazy ones.
- Limited Complexity: Lack of nuanced portrayals, reducing working-class individuals to symbols rather than individuals.

These early portrayals often served to entertain but also reinforced stereotypes that persisted for decades.

Post-War Cinema and the Rise of Social Realism

The post-World War II era marked a turning point, with filmmakers increasingly interested in depicting authentic working-class struggles. Movements such as British social realism emerged, offering gritty, unsentimental portrayals of working-class life.

Prominent features of this period include:

- Authentic Locations: Use of real neighborhoods and workplaces.
- Focus on Social Issues: Unemployment, poverty, labor rights, and community solidarity.
- Empathy and Complexity: Characters portrayed with depth, capturing aspirations and frustrations.

Films like "Saturday Night and Sunday Morning" (1960) and "Kes" (1969) exemplify this shift, emphasizing socio-economic realities and fostering empathy for working-class characters.

Contemporary Cinema: Diversity and Nuance

In recent decades, the representation of working-class individuals has become more diverse and nuanced. Filmmakers explore a broader range of experiences, addressing issues like globalization, economic precarity, and cultural identity.

Notable trends include:

- Intersectionality: Exploring how class intersects with race, gender, and ethnicity.
- Empowering Narratives: Stories of resilience, activism, and self-determination.
- Critique of Socioeconomic Structures: Films questioning capitalism, austerity, and social mobility barriers.

Examples include films like "The Farewell" (2019), which subtly examines class dynamics within immigrant communities, and "Sorry We Missed You" (2019), highlighting the gig economy's impact on working-class families.

Theoretical Frameworks and Critical Approaches

Marxist Film Theory and Class Analysis

A central approach within the Routledge collection is the Marxist analysis of film and class. This perspective views cinema as both a reflection and a reinforcement of capitalist ideologies.

Core concepts include:

- Ideology and Hegemony: How films perpetuate dominant class narratives.
- Representation of Exploitation: Depictions of labor, alienation, and class struggle.
- Cinema as a Tool for Class Consciousness: Films that challenge capitalist narratives and foster awareness.

For instance, the portrayal of factory workers in films like "Modern Times" (1936) underscores themes of industrial alienation, while more recent films critique the precariousness of contemporary gig work.

Cultural Studies and Identity Politics

Beyond Marxist frameworks, cultural studies emphasize how working-class identities are constructed and represented in film through cultural codes, language, and performance.

Key themes include:

- Authenticity and 'Real' Working-Class Identity: How films authenticate or distort working-class cultures.

- Representation and Voice: The importance of authentic working-class voices in filmmaking.
- Gaze and Audience Reception: How viewers interpret working-class characters and stories.

This approach encourages a critical examination of who creates these representations and for whom they are intended.

Impact of Film on Public Perceptions and Policy

Shaping Societal Attitudes

Cinema significantly influences societal perceptions of the working class, shaping notions of morality, work ethic, and social worth. Films can either reinforce stereotypes or challenge them, affecting public discourse and policy.

Examples include:

- The romanticization of the working-class hero in classic Westerns and action films.
- The portrayal of working-class communities as resilient and resourceful, fostering solidarity.
- Conversely, stereotypes of laziness, violence, or ignorance persist in some genres, perpetuating bias.

Influence on Policy and Social Movements

Films that depict working-class struggles have historically galvanized social movements and influenced policy debates.

Notable instances:

- The influence of "The Grapes of Wrath" (1940) in raising awareness about poverty and displacement.
- The role of documentary film in labor movements and union organizing.
- Contemporary films highlighting issues like housing crises and wage theft contributing to public advocacy.

By providing visibility and fostering empathy, cinema can be a catalyst for social change.

Challenges and Future Directions

Overcoming Stereotypes and Representation Gaps

Despite progress, challenges remain in ensuring authentic and diverse representations of the working class.

- Avoiding Stereotyping: Films must avoid reductive portrayals that reinforce biases.
- Amplifying Voices: Encouraging working-class filmmakers and storytellers to share their narratives.
- Global Perspectives: Expanding beyond Western contexts to include global working-class experiences.

Embracing New Technologies and Platforms

Digital media, streaming services, and independent filmmaking offer new avenues to depict working-class stories.

- Accessibility: Broader distribution of authentic stories.
- Interactive and Immersive Media: New formats that can deepen understanding.
- Community Engagement: Films that involve working-class communities as creators and audiences.

The Role of Academic and Cultural Institutions

Institutions like Routledge play a crucial role in promoting scholarship that critically examines class in cinema. Continued research, festivals, and public programs can foster a richer understanding and appreciation of working-class representations.

Conclusion: The Enduring Significance of Film in Reflecting and Shaping Working-Class Realities

Film and the working class Routledge Library Edit encapsulates an ongoing conversation about how cinema reflects, influences, and transforms perceptions of working-class life. From early stereotyping to nuanced contemporary portrayals, films serve as mirrors and molders of social consciousness. They can challenge stereotypes, inspire activism, and foster empathy by giving voice to marginalized communities.
